

# TITAN 43/20 STANDARD

*The compact firewood processor Titan 40/20 standard is a new cutting machine that uses a chainsaw bar to cut logs. In addition to being designed in accordance with the highest safety standards, it is also user-friendly.*

Log deck.

Log stabilizer.

Mechanical winch for adjusting conveyor height.

TITAN 43/20 standard CD

LIFTING TABLE (OPTION)

For easier work, the LT650 lifting table with a width of 1700 mm can be mounted in the front.

Oil tank for automatic chain lubrication with an oil level indicator.

Splitting knife height adjustment handle.

Splitting length 25, 33, 40 or 50 cm.

Durable and powerful harvest chainsaw bar.

Handle for optional deactivation of log retaining plate.

Log stabilizer handle.

Saw activation handle.

TITAN 43/20 STANDARD

- Compact bi-directional chain conveyor belt
- Harvester chainsaw bar
- Small and ergonomic

1. Log movement handle on the log deck.
2. Conveyor belt speed regulation.

The pressure gauges indicate the splitting pressure and the system pressure for auxiliary functions.

Chain lubrication adjustment system.

Handle for manual activation/deactivation of log splitting.

Shutter for retaining the log deck during transport.

## Class

## TITAN 43/20J STANDARD

Model		CD	E	CD+E
Engine power		/
