

## Kindlet 200

Fully Automatic Kindling Wood Machine

Designed & Manufactured in the UK

Fuelwood's fully automatic professional kindling wood machine, the Kindlet, has been in production since 2002. Using the company's own 'X' blade design, this robust machine created a new industry standard in kindling machinery, ensuring high volume, high quality and consistent kindling. It became the benchmark product for small and medium sized commercial operators both in the UK and overseas.

Kindlet 200 continues to convert timber off-cuts, pallet waste and round logs into kindling and its market leading two second cycle time is capable of processing 1.3 solid cubic meters per hour, equivalent to 120 nets. Now in its twelfth year, Kindlet 200 has been given a new, more compact design incorporating the ergonomic improvements that follow, to ease and improve the speed of operation, boost efficiency and reduce maintenance costs:

### Key Features:

- > Fully automatic operation
- > Converts timber off-cuts, pallet waste and round logs
- > Market leading 2 second cycle time
- > Changeover mechanism and Grease Line Station at front of machine
- > Robust design with 3 point linkage and forklift pockets for improved portability
- > Fully guarded with hinges to allow easier access to the splitting area and rear of the machine
- > Wide range of bagging options

### Fully Automatic Kindling Wood Machine

#### Technical Specifications

##### Overall Dimensions:

- > Length 2376mm (Bare Machine)
- > Length 3342mm (+Output Chute)
- > Length 2610mm (+RotabaggaTM)
- > Length 5160mm (+Manual BaggaTM)
- > Width 1115mm
- > Height 1295mm
- > Weight 400kg

##### Power Supplies:

- > 240v 1 Phase 2.2 kW 16amp
- > 415v 3 Phase 4.0kW 16amp
- > Tractor PTO drive – min 10hp @400rpm and 12V DC supply
- > Tractor Hydraulic – min flow 15 lpm 180 bar and 12V DC supply

##### Timber Input:

- > Off-cuts up to 200mm (8") square
- > Round logs 200mm (8") maximum diameter
- > Length 140mm to 165mm (5.5" to 6.5")

##### Timber Output:

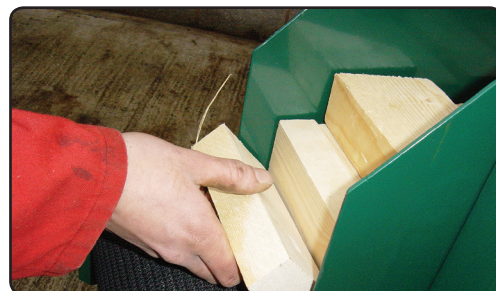

- > 1 & 3 Phase peak – 1.3 solid cubic meters/hour  
(equivalent to 120 bags of 45cm x 60cm size)
